PREFACE.....	iii
TABLE OF CONTENTS.....	iv
CHAPTER 1. Oscillatory Fluid Flow Regulates Glycosaminoglycan Production via an Intracellular Calcium Pathway in Meniscal Cells.....	1
Abstract.....	2
Introduction.....	4
Methods.....	10
Results.....	16
Discussion.....	18
References.....	35
Figure 1(A) Meniscal cell calcium response to 6.5 Pa shear stress.....	46
Figure 1(B) Calcium image of meniscal cells excited at 380 nm and visualized at 510 nm.....	46
Figure 2(A) % meniscal cell response at various shear stress levels.....	47
Figure 2(B) Relative peak amplitude of meniscal cell calcium response various shear stress levels.....	47
Figure 3 Meniscal cell calcium response to 4 Pa shear stress when calcium blocked by thapsigargin.....	48
Figure 4 Amount of Sulfated GAG produced by meniscal cells in response to various conditions.....	49
Table 1 Summary of meniscal cell calcium response to various shear stress levels and conditions.....	50
CHAPTER 2. Detection Techniques Used to Identify Meniscal Cell Production of Collagen Type I.....	51
Introduction.....	52
Methods.....	55
Results.....	57
Discussion.....	58
References.....	62
Figure 1 Rabbit 10-11 Western results.....	66
Figure 2(A) Rabbit 13 Western results.....	67
Figure 2(B) Rabbit 14 Western results.....	67
Table 1 Summary of Western procedure used and results for various trials.....	68

APPENDIX A.	69
Figure 1(A) Open surgery of rabbit knee joint.....	72
Figure 1(B) Excised menisci.....	72
Figure 1(C) Digestion of diced menisci.....	73
Figure 2(A) Meniscal cell calcium response to various shear stress levels.....	74
Figure 2(B) Meniscal cell calcium response to various shear stress levels with calcium blocked by thapsigargin.....	89
Figure 3(A) Calcium image of meniscal cells excited at 380 nm and visualized at 510 nm.....	91
Figure 3(B) Calcium image of meniscal cells excited at 380 nm and visualized at 510 nm with regions of interest demarking individual cells.....	98
Figure 3(C) Calcium image of meniscal cells excited at 340 nm and visualized at 510 nm.....	99
Figure 3(D) 340:380 nm ratio image visualized at 510 nm after 28 sec of OFF..	99
Figure 3 (E) 340:380 nm ratio image visualized at 510 nm after 18 sec of OFF.....	100
Figure 3 (F) 340:380 nm ratio image visualized at 510 nm with regions of interest demarking individual cells after 18 sec of OFF.....	100
Figure 4 (A) Macro used to visualize real time 340:380 ratio response of meniscal cells.....	101
Figure 4(B) Macro used to analyze real time 340:380 ratio response of meniscal cells.....	101
Figure 5(A) Calcium imaging flow chamber.....	102
Figure 5(B) Calcium imaging setup.....	103
Figure 5(C) Calcium imaging schematic.....	104
Figure 6(A) Protein studies flow chamber.....	105
Figure 6(B) Protein studies schematic.....	106
APPENDIX B.	107
Table 1.1. Summary of meniscal cell calcium response for each sample at various shear stress levels.....	108
Table 1.2. Summary of meniscal cell calcium response for each sample at various shear stress levels with calcium blocked by thapsigargin.....	109
Table 2.1. Summary of protein production study results for 1 day incubation Period at 4 Pa and no flow.....	110
Table 2.2. Summary of protein production study results for 2 day incubation Period at 4 Pa and no flow.....	111
Table 2.3. Summary of protein production study results for 3 day incubation Period at 4 Pa and no flow.....	112
Table 2.4. Summary of protein production study results for 3 day incubation period at 1.5 Pa and no flow.....	114
Table 2.5. Summary of protein production study results for 3 day incubation period with calcium blocked by thapsigargin at 4 Pa and no flow.....	115
Table 3. Summary detailing lab group specimens received from and OFF duration used in protein studies for each specimen.....	116

APPENDIX C.	117
Calcium Analysis.....	118
Calcium Blocking.....	122
Calcium Imaging Studies.....	124
Cell Counting Protocol.....	135
Cellular Plating Protocol for Fluid Flow Experiments.....	137
Chemical Hydrolysis of Fura2 AM Esters for Imaging System Testing.....	139
1,9 Dimethylmethylene Blue Total Proteoglycan Assay (DMB).....	141
mRNA Sample Isolation and Storage.....	146
Protein Production Experiments.....	147
Quartz Slide Cleaning Protocol.....	154
Rabbit Isolation.....	155
Shear Stress Determination for Calcium Imaging Studies.....	157
Total Protein Isolation (UREA).....	159
Total Protein Qauntification (LOWRY).....	161
Western Blotting	164
APPENDIX D.	171
Biological Material Transfer Agreement.....	172
